Helth Fonna have more than 3000 employees who have their goal of providing the best possible care to our patients. Helth Fonna covers 19 municipalities with around 180 000 inhabitants.

[www.helse-fonna.no](http://www.helse-fonna.no).

Haugesund is a city in the region West of Norway. Haugesund is the regional center for 100.000 inhabitants. Even though Haugesund is not big, it has almost everything you will find in a big city. The city offers also a lot of cultural activities as a jazz- and film festival.

From Haugesund airport it takes 20 minutes to the central of Haugesund and to Haugesund hospital.

The Immunology & Transfusion Medicine laboratory is a part of the Section for laboratory medicine in Helse Fonna. The whole section for lab medicine including lab for Immunology & Transfusion Medicine is planned to be upgraded and will shift to a new modern building in 2021. We have planned fresh investments in modern instruments as well as increase in automation
