

MEDIOR .NET DEVELOPER

The company is an industry reference in B2B Mobility Services, powered by the best in class Automobile Clubs and Assistance Partners. The Group Shareholders are: ADAC, AA, ANWB, ACI, ÖAMTC, RACE, Touring & TCS.

The company has been formed back in 1991 to address the needs of the B2B market by offering pan-European roadside assistance, travel and personal services.

Today, the firm is the largest supplier of roadside assistance services in Europe with an outstanding network in more than 40 countries. Furthermore, it is now entering new fields of activities linked to the concept of full Mobility and Connected Services (Connected car / Connected people), exploring new channels of distribution and enlarging its geographical scope.

In order to meet the increasing demand of the market and to strengthen its international Sales Team in Brussels (Evere), the company is looking for several **Medior .Net Developers (m/f)** for the area B2B roadside assistance to join the team as soon as possible.

The job responsibilities:

- The .Net Developer is primarily responsible for providing development, enhancement, troubleshooting and maintenance to company's software applications.
- Additional responsibilities include documenting, designing and developing new features for software applications per customer or internal specifications as well as identifying, troubleshooting and debugging defects in designated code.
- The .Net Developer will also assist in the creation of long term strategies related to the evolution of existing and new platforms to high-available, service-oriented architectures.

Key tasks:

- Provide support for existing applications
- Development of web services and applications in C# using .NET framework and Microsoft technologies
- Development of both backend and frontend solutions
- Write technical specifications

The wanted profile

- A1 and/or equivalent degree in IT with at least 2 years of experience as .Net developer
- Passion for IT (studious, interested in new technologies)
- Analytical, but practical and solution driven minded
- Advance knowledge of:
 - .Net framework
 - C#, LINQ
 - ASP.NET MVC
 - XML, REST, web API, HTML5, JavaScript
- Familiar with the following:
 - Relational databases (SQL Server TSQL)
 - Database design and normalization
 - HTML, JavaScript and CSS
 - SOAP

- AngularJS
- Entity Framework (any other Object Relational Mapper would do)
- TDD (Test driven development)
- Any experience with mobile app. development is a plus
- Desire to continuously learn and grow
- Able to debug and troubleshoot
- Being able to work thoroughly, punctual and structural
- Being able to work independently and take initiative
- Capacity to work in team
- Be able to work easily in English
- Capability to deliver on time at the expected level of Quality and Cost
- Good ability to communicate
- Strong team-working attitude
- Project Management knowledge is a plus

The offer:

An interesting job opportunity with plenty of variety in an international, multicultural & multilingual environment

Non-managerial salary package in line with responsibilities, including fringe benefits like group insurance, hospitalisation insurance, luncheon vouchers etc

an easy access office location in Brussels

Working hours following a flexitime schedule (no home office)
