

# Welcome to southern Germany!

International Personnel Services Baden-Württemberg

**Bundesagentur für Arbeit**

Zentrale Auslands-  
und Fachvermittlung (ZAV)

A mid-sized company develops and produces forward-thinking system monitoring products. These are a perfect fit and in line with requirements – from both a technical and economic standpoint. Customers around the world are excited about a product portfolio that is easy to operate and simple to commission. They also enjoy highly flexible custom solutions and competent service from a reliable expert with 40 years of experience. Detection and alarm systems from the company monitor electrical switching systems, in particular in the energy generation and distribution field. In addition, the company offers a comprehensive range of remote controlling systems to increase the availability and operational safety of countless different systems in power, gas, water supply and drainage, traffic engineering and industrial applications. The company is well positioned to continue growing in a variety of market segments into the future, both nationally and internationally.

To support the company's team, the ZAV is searching for the following position to start as soon as possible:

## **Project engineer or Measurement, control and regulation technician**

### **Your duties:**

- Technical customer support, both on the phone and on site, including internationally
- Preparing requirement specifications and project documentation
- Equipment configuration and system configuration, coupling interfaces and protocols and external systems
- PLC programming and visualization on an HTML basis, networking equipment and systems in IT infrastructures
- Close collaboration with development in KVP
- Project management of some individual projects, responsible for budgets, costs and schedules

### **Your profile:**

- Well-founded technical education or degree with a focus on measurement, control and regulation technology, automation or communications engineering
- Long-term practical experience in energy or measurement, control and regulation technology
- Expertise in encryption technologies such as SSL, VPN, IPSec or IT protocols • Expertise in station and process control engineering
- Experience in direct customer service
- Interest in international travel
- Language abilities: English above level B1/B2, German above level B1
- Ability to work independently, loyalty, reliability and discretion are essential

### **What the employer offers:**

You can expect an exciting, challenging and versatile range of duties with a large amount of freedom to design your own ideas and projects in a person-oriented work culture with short decision-making pathways. We offer attractive compensation with flexible working hours and individual development opportunities.
