Backend Developer

Number of Posts: 2

Contract Type: Permanent – Full Time

Job description

We are looking for an enthusiastic and motivated Backend Developer to join our platform team. You will have the opportunity to work on and build all parts of the platform: business logic, external APIs, admin APIs, integrations with game and payment providers, as well real-time integrations with other internal systems such as the data platform and middleware.

New development will all be using Kotlin, a modern, concise, safe language which is accessible to all developers, especially those with Java experience.

Responsibilities:

• Work in an agile team consisting of other backend developers to build and maintain microservices in Spring Boot and Kotlin to handle platform business logic.

• Liaise with other tech teams and product team to provide functionality over REST APIs.

• Participate in task estimations, planning and code reviews.

• Integrate with third party systems to allow for a greater number of products on the platform.

• Gather knowledge in business requirements to be able to ease operations.

• Collaborate with engineers across the department to identify and build on improvements to our processes and systems.

Requirements
- Advanced knowledge of Java (2/3 years of experience)
- SQL
- Spring Framework (1 year experience)
- Basic GIT knowledge is necessary
- Working in scrum team

Training provided: Yes, however candidate must possess the minimum requirements and training can be offered for additional skills

Any assistance with accommodation/relocation: We cover relocation costs and provide temporary accommodation.

- **Any other benefits:**
- Commuting Assistance
- Performance Bonus
- Wellness Package
- Health Insurance

- Work From home Allowance

Salary
Eur 30000-35000 (depending on candidate's experience)

How will the interviews be held?
All interview stages are done remotely.
