Product Owner

Number of Posts: 1

Contract Type: Permanent – Full Time

Job description

As a Product Owner you will work on managing the product backlog with the aim of achieving business goals of the company as well as meeting the priorities of its customers. The role is also an integral part in the creation of the same backlog, including analysing requirements and writing product specifications through which technical and development tasks are created. Working in a team of Product Owners, and reporting to the Head of Product, you will be a key function between business and technical teams, where language and quality of communication is key.

Key Responsibilities

- Report to the Head of Product and contribute to the development and maintenance of the roadmap and strategic vision for the company's products
- Communicate with customers to clarify business requirements and to update them on progress
- Gather requirements, own the product backlogs, and write professional user stories for products that deliver on functionality, defects, and other work items for the team
- Write product specification documents in clear English, that take into account all business requirements, identify gaps and loopholes, whilst preserving the product's quality
- Manage requirements dependencies with other teams, negotiating and prioritising as appropriate
- Facilitate backlog refinement sessions
- Work closely with the project management and development teams to set development/sprint goals
- Work closely with business stakeholders and development teams to implement and get product increments delivered
- Review development against acceptance criteria to determine readiness
- Demo products to key stakeholders
- Produce business cases for product features
- Be up to date with industry trends and carryout competitor analysis to be fed into the roadmap
- Maintain strong working relationships with customers and our commercial team to retrieve information about product line performance, and to present business strategies

Requirements

- 4+ years' experience as a Product Owner in iGaming or Fintech industry
- Able to design customer centric, while scalable product functionalities
- Make use of writing and/or diagrams to create well explained product specifications.
- Organised
- Experience working in an agile environment (SCRUM preferred)

- Effectively transfer knowledge to other team members
- Negotiation skills
- Ability to give suggestions aimed at improving product quality
- Self-motivated individual always looking to better their skills
- Analytical and attention to detail
- Good problem-solving skills
- Excellent verbal communication skills and interpersonal skills
- The ability to quickly learn new things and adapt

Training provided: Yes, however candidate must possess the minimum requirements and training can be offered for additional skills.

Any assistance with accommodation/relocation: We cover relocation costs and provide temporary accommodation.
